**WRITING 1**

Write at least **100 words** on the following topic:

**“Online shopping is better traditional shopping”**

Do you agree or not? Give your reasons.

Your writing should be **clear** and **interesting**.

The issue of online shopping is attracting increasing attention. If we consider which is better, we will find that there are advantages and disadvantages to both.

One advantage of online shopping is that it can save time and effort. It is easy to log on the web and find the item by name. Also you can compare prices and read reviews about what you want to buy.

Another advantage of online shopping is that it is available all time. You can order goods from any country and pay while you are sitting at your office.

On the other hand, traditional shops, markets and malls need have working hours, so you need certain time to go shopping. Most malls for example are located at the outskirts of towns as result you need a car to go there.

Another disadvantage of traditional shopping is that sometimes you buy things you don't need. There are lots of sales and offers some people can't resist the temptation.

To summarise, although online shopping is excellent and has positive points, people should consider that some items shown on the screen aren't the same as in your hand.
